Protecting your day-to-day business during IT transitions

Dear!

I know you are busy, so I will keep this brief.

Whether your immediate goal is to stabilize and optimize your existing **Infor LX/BPCS infrastructure on IBM i**, or you are actively planning a transition to SAP, **our global team has the 30+ years of experience needed to guarantee success**.

We ensure that your legacy applications remain a reliable asset, not an operational bottleneck.

If now is not the right time, I understand. However, if you would like to keep **a trusted partner in reserve for future support or data migration** needs, let's connect briefly to introduce ourselves properly.

Please let me know if you have time for a short introductory call this or next week.

Best regards,
Helmut Friesl/CEO
